

Health and Safety Policy Statement

Cannings is committed to providing an exceptional level of service and product to all our clients. At the core of this commitment is our Health and Safety Policy.

At the heart of all our projects, works and partnerships is an underlying commitment to ensure that all risk to employees, contractors, clients and general public is reduced to a minimum. As such Health and Safety best practices have been set to ensure we comply with the “Health and Safety at work Act 1974” and associated legislations whilst maintaining a culture of continual improvement and learning to ensure the safety of everyone involved.

In order to ensure our commitment and standards all our employees and contractors follow the below basic principles, as well as our strict Health and Safety Policy.

- Identify applicable laws and legislations and ensure continually training and development for staff to ensure best practice and compliance
- Understand the nature of our business and services, identify the additional risks involvement and ensure these are highlighted and directly acknowledged and minimised
- Review best practices, involving employees to ensure continuous improvement
- Review Health and Safety Policy to ensure at minimum meets current legislation, but strive to always exceed minimum best practice
- Ensure all employees understand the importance of Health and Safety as a core business value and their role and responsibility within this
- Ensure adequate use of feedback loop for both improvements and potential risks, including onsite risk assessments that are then immediately available to management for review.
- Ensure adequate training and qualifications are always maintained to protect the integrity of our employees, contractors, clients and general public.

At Cannings we understand the importance of our employees in every aspect of our business, especially the impact on our Health and Safety responsibilities and understand that the key is to ensure their competence, training and confidence and the impact this has on reducing risk and we are dedicated to continually improving upon this.
